ABOUT ME

GENERAL INFORMATION

Full Name: Kiriam Campobadal Forés
Born Date: 21st December 2001
Phone Number: +34 638 220 025

EDUCATION

ICT SYSTEMS ENGINEERING

Polytechnic University of Catalonia
Currently studying
Started September 2019
Expected graduation June 2023

CERTIFICATE OF EDUCATION

INS Lacetània
Graduated June 2019 | Manresa, ES

FIRST CERTIFICATE

Cambridge English
Graduated June 2017 | Manresa, ES

SKILLS

TECHNICAL SKILLS

Proficient with
Python • C • HTML5 • CSS3 • PHP
Erlang • SQL/SQLite • Laravel
Javascript • VueJS • SolidJS
Familiar with:
Raspberry Pi • FreeCAD
Adobe Premiere Pro • Photoshop
VHDL • Arduino

SOFT SKILLS

Strong
Leadership • Resourcefulness
Perseverance • Grit

LANGUAGES

English, Catalan and Spanish

EXPERIENCE

IOT, MICROCONTROLLERS & FPGAS | Others

January 2020 - Present

- FPGA programming using VHDL.
- Intel® Quartus® as the software to test our VHDL code. Simulation tools.

SOFTWARE DEVELOPMENT | Problem solving

September 2018 – Present

- Object orientated programming with Python and Erlang.
- API requests and implementation using Python.
- Concurrency programming with C and Erlang.
- Full Stack web development using Laravel.

TECHNICAL PROJECTS

SMART MIRROR | Raspberry Pi

August 2017 – June 2018 | Manresa, ES
Built my version of a Smart Mirror by building a simple front-end orientated website that had to be opened on a Raspberry Pi display.
The website required API data manipulation.

PERSONAL WEBSITE | Front-End Orientated

July 2019 - August 2019 | Manresa, ES
Created my personal website using HTML5 and a CSS Framework (Tailwind CSS).

LICENSE PLATE READER | Python

December 2019 | Manresa, ES
Created a script capable of reading the license plates of cars via photographs.
It consisted of digitalising the image in order to get the text representation of the license plate.

ELEVATOR SIMULATION | Erlang & Arduino

December 2021 | Manresa, ES
Simulation of an elevator using Erlang and Arduino Serial via multi-processing.
Computer interface made with wxWidgets.

LINUX SHELL FROM SCRATCH | C

December 2021 | Manresa, ES
Created my own Linux SHELL with basic built-in functions and the ability to execute non-built-in functions via multi-processing.

WEB APPLICATION | Full Stack

September 2022 - December 2022 | Manresa, ES
Developed an application capable of managing users, machines and laboratories.
Real-time machine consumption monitoring in communication with ESP32 chip microcontrollers using HTTPS protocol.
Website developed using Laravel, TailwindCSS and SolidJS.

CURRENTLY LEARNING

- Deep learning (Artificial Intelligence)
